ENGR

Comments

a) the course

- Going over more math that is on the homework's and exams would be better
- Hard course but professor made it likeable
- Really interesting
- The course is well structured The Moodle page is very helpful in making sure that you don't miss any assignments The topics covered are interesting but when it comes time for the homework's prepare for half of it to be things that you have never seen A lot of the homework and exams I felt were a teach yourself thing
- interesting class to get to know how space and thing around us works

b) the instructor's teaching

- Awesome job explaining and being open to class questions
- One of the best teacher I had
- The instructor is very nice and teaches the class well but when I would do the actual assignments most of them were on things that were never talked about in class or in the notes Usually the second half of the homework was on material that hadn't even been covered yet

What improvements would you suggest?

- None He is awesome
- Reconstruct the homework so that they are actually relevant to what is lectured in class and line them up better with the classes so that future material isn't on them
