Comments

a) the course

- 4
- Difficult
- I liked this course I took it in high school already so it wasn't too bad but I enjoyed the way it was taught
- Large step up from Physics I If you are not prepared you can fall behind quickly
- Pretty good
- The course is pretty challenging but not on a level we can't handle
- The labs weren't bad nothing to write home about My only complaint is that most of the labs I didn't know the concepts until I got to lab since I wasn't taught them yet
- hard and boring but not awful
- it was good

b) the instructor's teaching

- 4
- Excellent review sessions Not my lecture professor can only comment on review sessions I have attended
- I didn't have him as a teacher so I don't really know
- I don't have this professor so I can't comment on his teaching
- Most of the labs weren't graded until the end of the school year In addition to that I was never told on what I lost points on and why I did This made it impossible to know how to improve my lab reports or to even know what I did wrong
- Very helpful
- Very helpful in office hours
- good
- great

What improvements would you suggest?

- 4
- A physics discussion class or a more practice-oriented lab would be cool
- Easier home work
- Grades the labs on time not 4 months later and give feedback rather than a random score
- I think the homeworks should be shortened a little bit I think we should get a second attempt on the whole homework That way after we try and eventually get the answer we can redo the whole thing and get a 100 on the homework This way it allows us to learn but also not worry about it being at the expense of our grades

- NA
- no
- wayyyyyyy too much homework expertta sucks
